3d Modeling In Autocad Creating

The process of creating a mathematical representation of any surface of an object in three dimensions by using special software is called 3D modeling. A 3D model can even be represented as a two-dimensional image by using the 3D rendering process. The user can also create 3D models physically using 3D printers. There is a lot of software that ...

Surface modeling provides the ability to create and edit associative and NURBS surfaces. A surface is a 3D object that is an infinitely thin shell. There are 2 types of surfaces: procedural and NURBS. Procedural surfaces can be associative, maintaining relationships with other objects so that they can be manipulated as a group. NURBS surfaces are not associative. Instead, they have control ...
