biology 2 system chapter 36 nervous Flashcards and Study ...

Overview of the Nervous System. The nervous system, illustrated Figure $\{\{2\}\}$, is the human organ system that coordinates all of the body's voluntary and involuntary actions by transmitting electrical signals to and from different parts of the body. Specifically, the nervous system extracts information from the internal and external environments using sensory receptors.

11.2: Introduction to the Nervous System - Biology LibreTexts

The central nervous system (CNS) is made up of the brain, a part of which is shown in Figure [\\(\PageIndex{1}\\)](#) and spinal cord and is covered with three layers of protective coverings called meninges (from the Greek word for membrane). The outermost layer is the dura mater (Latin for “hard mother”). As the Latin suggests, the primary function for this thick layer is to protect the brain ...

Chapter 37: The Immune System These worksheets are provided as a supplemental resource for educators and students using this popular Glencoe textbook. No copyright is implied over the content of this textbook.

Glencoe Biology - Free Printable Textbook Worksheets

The primary function of the nervous system is to receive information and to generate a response to a given stimulus. The information and the response could be simple, subtle or complex. For instance, when a hot object is touched, its temperature is conveyed quickly to the central nervous system and the response is an immediate reflex of removing the hand, through the action of skeletal muscles.

(PDF) THE HUMAN NERVOUS SYSTEM THIRD EDITION

Sympathetic Nervous System. The sympathetic nervous system is responsible for the “fight or flight” response that occurs when an animal encounters a dangerous situation. One way to remember this is to think of the surprise a person feels when encountering a snake (“snake” and “sympathetic” both begin with “s”).

35.4: The Peripheral Nervous System - Biology LibreTexts

The nervous system or the neural system is a complex network of neurons specialized to carry messages. The complexity of the nervous system increases as we move towards higher animals. For instance, cnidarians such as jellyfish have relatively simple nerve nets spread throughout their

body.

Human Nervous System (Structure, Function & Parts)

Key Terms. preganglionic: describing the nerve fibres that supply a ganglion; sympathetic nervous system: the part of the autonomic nervous system that under stress raises blood pressure and heart rate, constricts blood vessels and dilates the pupils; parasympathetic nervous system: one of the divisions of the autonomic nervous system, based between the brain and the spinal cord, that slows ...
