Check your transmission fluid.

Transmission fluid lubricates the moving parts of your transmission. You should check your fluid every 30,000 to 60,000 miles in a manual transmission car.

Failure to do so can cause your transmission fluid to become contaminated with bits of metal from the bearings, synchronizers and gears.

it's the syncros of the transmission telling you at 10 mph you don't need 1st gear, put it in 2nd and crawl, and if you continue to try and shove it in 1st when it's not really needed, you're just wearing things out. Yes it's not a normal action of a transmission, and XYZ other manuals don't act that way but it's what VW decided to toss us.
