It is inadvisable to use a dependence on R with patchlevel (the third digit) other than zero. Doing so with packages which others depend on will cause the other packages to become unusable under earlier versions in the series, and e.g. versions 4.x.1 are widely used throughout the Northern Hemisphere academic year.

The IRC Committees will not normally review Grant applications unless a complete protocol is submitted for review. Protocols that are the result of successful grant awards following the C1 process, and that have already undergone scientific review, will only be re-reviewed by the IRC if substantive changes to the study design have taken place.

Procedure: Internal Review, Research Proposals and Study Protocols

The study population was divided into four age groups: patients under 20; 20-39; 40-59; and 60 years or older. Job types were classified as office workers, manual workers, and others. The residential areas were divided into four regions: northern Taiwan; central Taiwan; southern Taiwan; eastern Taiwan and offshore islands.
