Home > Books > Pulp and Paper Processing. Downloaded: 1966. Abstract. In general, the main raw materials of pulp and papermaking industry can be classified into three categories: wood, non-wood, and non-plant (mainly wastepaper), of which non-wood fiber material is an important fiber source in the areas where forest resources are scarce ...

Pulping and Papermaking of Non-Wood Fibers | IntechOpen

Pulp magazines were inexpensive fiction magazines that were published from 1896 to the late 1950s. The term pulp derives from the cheap wood pulp paper on which the magazines were printed. In contrast, magazines printed on higher-quality paper were called "glossies" or "slicks". The typical pulp magazine had 128 pages; it was 7 inches wide by 10 inches high, and 0.5 inches thick, with ragged, untrimmed edges. The pulps gave rise to the term pulp fiction in reference to run-of-the-mill, low-quali

Pulp magazine - Wikipedia

The book provides detailed information on environmental issues related to pulp and paper mills and their associated processes, and is intended to help increase understanding of the factors affecting environmental load, including liquid effluents, air emissions and solid wastes.

Pulp and Paper Processing. Edited by Salim Newaz Kazi. University of Malaya. This book gives emphasis to wood fiber raw materials, alternative sources of fibers for paper production, environmental issues, paper quality improvement and cost of paper production. Varieties of non-wood raw materials, including kenaf, rice straw, empty fruit bunches of palm trees, bamboo, bagasse, etc., are considered in this book.

Pulp and Paper Processing | IntechOpen

While some of the earliest examples of paper made from wood pulp include works published by Jacob Christian Schäffer in 1765 and Matthias Koops in 1800, large-scale wood paper production began in the 1840s with unique, simultaneous developments in mechanical pulping made by Friedrich Gottlob Keller in Germany and by Charles Fenerty in Nova Scotia.

Pulp (paper) - Wikipedia

Pulping a book is stripping a book of its cover and having the torn book pulped and recycled in the plant. The severed cover is sent back to the publishing house as evidence that the book has been destroyed or discarded or recycled into paper or cardboard products.
