Drivers of chronic illness, such as chronic inflammation, oxidative stress, and microbial infections are known triggers that can activate retroviruses already present in one's own DNA. Oral cavitations and heavy metals are additional triggers. HERVs can also be acquired through vaccines, which contain animal-based retroviruses.

Retroviruses And Their Correlation To Cancer & Chronic Disease

Chronic pain is any pain that persists or recurs for 3 to 6 months or longer. Acute pain, such as flu-related body aches or pain due to an injury, can be mild or severe but generally goes away relatively quickly—either almost immediately or at least within a few days or weeks.
