"It is exciting to get a better understanding and details at the molecular level," she says. She also finds it interesting that this stinky body odor has been around longer than humans have existed as a species. Now that the York team has identified the chemistry of human body odor, they can develop new types of deodorants, says Rudden.

### Stinky success: Scientists identify the chemistry of B.O ...

Exactly what makes thiols so stinky is a mystery, Rudden says. But it's related to the sulfur atom in the molecule — the "S" in 3M3SH. "By itself, sulfur is odorless," she says. But when bonded to another atom, it can give rise to an unpleasant scent. Our noses have what amounts to "a chemical sensor" to detect it, Rudden notes.
