ABSTRACT: The origins of the Indus Valley Civilization are shrouded in mystery. Two significant questions from this

On The Brahmi-Indus Connection (A new passage to Indus ...

The Indus script (also known as the Harappan script) is a corpus of symbols produced by the Indus Valley Civilization. Most inscriptions containing these symbols are extremely short, making it difficult to judge whether or not these symbols constituted a script used to record a language, or even symbolise a writing system. In spite of many attempts, the 'script' has not yet been deciphered, but ...

Indus script - Wikipedia

decipherment attempts of the Indus Script Slightly over 400 basic signs have been identified as part of the Indus Script. Only 31 of these signs occur over 100 times, while the rest were not used regularly.

Indus Script - Ancient History Encyclopedia

But serious decipherment breakthroughs have relied on three key elements so far absent from the Indus corpus: 1) Proper names, such as kings or cities, known from records of contemporaneous cultures. During the process of deciphering Egyptian hieroglyphs, scholars benefited from the mention of rulers like Ptolemy and Cleopatra in ancient Greek texts, understood at the time.

Why We Still Can't Read the Writing of the Ancient Indus ...

Indus script remains to be deciphered. However, we can say that the Indus Valley civilization, aka the Harappan civilization, is the earliest known urban constellation in the Indian subcontinent, and survived until at least 1,700 B.C.E. Archaeologists found no less than 700 such wells in Mohenjo Daro Credit: Tauseef Razi Malick

Uncovering the secrets of the Indus Valley civilization ...

Of the few scholars, who have claimed to have succeeded in deciphering the Indus script, the method evolved by the German, Mr Egbert Rochter Ushanas, gives a new dimension to the tantalising search. </P> <P>After over six years of research, he has come up with a method that relies heavily on the verses of the ancient Rig Veda, and the premise that the holy scripture was influenced by the Indus way of thinking.

Decoding the Indus Script - HinduNet

The Indus script is an unknown writing system, and the inscriptions discovered are very short, comprising no more than five signs on the average. With good reasons, the prospects of a successful decipherment have been considered meagre at best.

Full Text Version of Deciphering the Indus Script | Harappa

Earlier Attempts for Decipherment of Indus Script: In 1931 J. Marshall published his magnum work where Gadd and Langdom had important contributions on decipherment. According to them, the language group was Indo-Aryan and they might have been the ancestors of Brahmi. From 1950 researchers started to read them in the Dravidian way.

A New Light on the decipherment of Indus-Saraswati Script ...

Just like the Egyptian civilization which remained a mystery until the 18 th century, so was the Indus Valley until 1992 when Pathak and Verma disclosed to the world that they had found the tribals in the state of Bihar in India, using the script. Verma had spent considerable amount of time with the tribals to come up with the decipherment.

ON THE DECIPHERING OF THE INDUS

Decipherment Many people have tried to decipher the Indus script, but none have succeeded so far, or at least none have produced a generally-accepted decipherment. Some believe that the Indus script was used to write a Dravidian language, others that it was used to write an ancestor of Sanskrit.
