Even if high prices aren't able to increase supply and the shortage remains, an Economics 101 class might still teach that price is the best way to allocate scarce resources — or at least, that it's better than the government price controls or rationing. As a consequence, less-wealthy people may simply have no access to empanadas.

Is 'greedflation' rewriting economics, or do old rules still apply?

In economics, an externality or external cost is an indirect cost or benefit to an uninvolved third party that arises as an effect of another party's (or parties') activity. Externalities can be considered as unpriced goods involved in either consumer or producer market transactions. Air pollution from motor vehicles is one example. The cost of air pollution to society is not paid by either ...

Republicans point to the CBO's latest budget forecast and say it's proof the 2017 tax cuts did exactly what Republicans promised: stimulate so much new economic activity that tax receipts would go up even as tax rates went down. But the CBO report doesn't say that at all. The latest forecast mentions the 2017 tax law at least 30 times. But to explain the big boost in 2022 revenue, it ...
