Why Do Buses Come in Threes: The Hidden Mathematics of ...

In reality, buses usually come in twos. Only on long bus routes is it common for buses to come in threes. The reason for this phenomenon is that buses often make long stops to allow large groups of passengers to board. When this happens, the next bus on the route usually approaches before the bus preceding it departs. A bus route must be very long for a third bus to join the bunch. Therefore, buses usually come in twos; only on very long routes do they come in threes.

The reason why buses bunch is nothing to do with incompetent planning by the bus companies. Bunching is a simple fact of life. Even if buses leave the depot every fifteen minutes on the dot, the passengers arriving at bus stops are not so consistent. They arrive much more at random.

Why do Buses Come in Threes ? | guernseydonkey.com

These things can help - but the ubiquity of bus bunching suggests that they can't eliminate the problem altogether. So the next time someone in your hearing asks why it is that buses all come along at once, you can reply, "Mathematical inevitability". Then you can look smug about it, as they, presumably, decide that they'd rather walk.

Q: Why do buses come in threes? A: Mathematical ...

Where To Download Why Do Buses Come In Threes The Hidden Mathematics Of Everyday Life

First of all, a small disclaimer. It's actually far, far more likely that the buses will arrive in twos. The usual saying is great; we like to over-emphasise things when complaining and three is a very powerful number in the English language (think Goldilocks and the three Bears, three attempts to guess Rumpelstiltskin's name, the rule of three when using adjectives etc.).

Why Do Buses Come in Threes? | HubPages

The old joke that you wait ages for one bus, then three come along at once, is bordering on cliché. But it's also, as it turns out, true - not just because of bad planning, but also because of maths. The phenomenon is so common, in fact, that it has a choice of names. Bus bunching, clumping, convoying, platooning - all relate to the depressing reality that, over any length of time, buses serving a single route are likely to end up tootling along directly behind each other.
